What is black and white and loved all over?

A giant panda!

Have you ever seen a giant panda?

Most people have not.

Giant pandas are bears.
They live in bamboo forests in China.
Bamboo is what they eat.

There once were thousands of pandas in China.
Now there are less than 1600.
They are **ENDANGERED**.

ENDANGERED animals may someday be gone from the earth. Scientists are trying to find ways to save them.

Some pandas live in zoos. This fall, two pandas are coming to Zoo Atlanta. Their names are Yang Yang and Lun Lun.

In California, everyone was happy when a baby panda was born at the zoo.

Draw a picture of a baby panda in the box below.
