What happens when you sleep?
Do all animals sleep?

Do you sleep enough?
When you sleep, your body is very quiet...

...but your brain is working hard.

You dream every night.

When you dream, your eyes move back and forth.
All animals sleep.
Some animals sleep a lot more than other animals.

Bats sleep 20 hours each day. They sleep upside down.

Giraffes sleep only 2 hours each day. They sleep standing up!

Usually, bigger animals sleep more than smaller animals.
Sleep Time

Children need to sleep at least 10 hours every night. How much do you sleep?

Use a blue pencil to mark the time you go to sleep.

Use a red pencil to mark the time you wake up.

Count the hours between the blue and red pencil marks to see how long you sleep!

Here are some things that help you sleep.

Bedtime at 8 PM

A dark, quiet room

Reading

Here are some things that make it harder to sleep.

Bright light

"Wake-up" drink

Too late!
